

Finite-ring spectral alternatives

Triad, $N = 3$

positive radii: real quotient
near stable equality: SPD

Six-ring, $N = 6$

generic weak domain: real
exceptional native defect

$N = 3q, q \geq 3$

distinct radii + $\Gamma B \neq 0$:
non-real Bloch modes

$$\delta < 0$$

complex pair

$$\delta = 0$$

rank 1, square zero

$$\delta > 0$$

three simple real roots
