

## GENERIC COVERS OVER THEIR UNCHANGED TARGETS

$$n = 2$$

$$\text{Mon} = C_2$$

Closure degree 2

Genus 0

One rational partner

$$n = 3$$

$$\text{Mon} = S_3$$

Closure degree 6

Genus 1

Quadratic correspondence

$$n = 4$$

$$\text{Mon} = S_4$$

Closure degree 24

Genus 13

Cubic correspondence

Paper I: the larger quadratic quotient/lift tower is a separate extension.
